Back to School: Creating Visuals, Routines & Schedules

Start the school year strong! Join us for a practical session on creating personalized tools to help your child navigate transitions, build confidence, and thrive in the new school year.

What we will cover:

- ◆ Routines & Schedules – Build effective visual schedules and routines that reduce anxiety and increase independence at home and school
- ◆ AI-Supported Tools – Discover how technology and AI can help you quickly create personalized visual supports and stories tailored to your child's needs
- ◆ Lived experience and insights from families – Hear real-world perspectives on preparing students for the back to school transition

Whether you're preparing for a new classroom, teacher, or daily routine, these strategies will help smooth the transition and set your child up for success.

Perfect for families of autistic children at any age or stage! Bring your questions and ideas.
