My COVID-19 Story
The world is experiencing a pandemic.
Pandemics are caused by diseases that spread from person to person.
A pandemic means many people could get sick.
This sickness is called COVID-19.
To keep everyone safe, you will be at home a lot.
Everyone in your town is also staying home.
There is no school right now.
There are things you can do at home.
It is very important to wash your hands.
It's ok to be unhappy or worried.
Your family can help you feel better.
